Calgary Manlift Ticket

Calgary Manlift Ticket - The Elevated Platforms and Manlifts Certification course helps to provide the required training on the work practices, safe operating procedures, regulations and rules regarding the everyday activities for the operators of this equipment. The program has been designed for individuals who are actively involved in these activities or those who have a basic knowledge of this equipment.

During the last couple of decades, manlifts and aerial platforms have become a common sight in industrial maintenance applications and on construction job sites. These machinery provide an easy way to lift staff near what should be performed on a stable platform apparatus, allowing workers to carry out tasks with greater safety and comfort rather than being perched on top of ladders or scaffoldings.

Like every other device, manlifts are only safe if they are utilized properly. Because they lift workers above floor or ground level, accidents can easily take place and this might cause serious fatalities or injuries for both the operators of the manlift as well as whoever passerby who may be unlucky enough to be standing beneath.

There are different models of manlifts. The majority fall into 1 of 2 categories: the articulating boom lift, which has the capability of both horizontal and vertical movement and the scissors lift, that is capable of moving upward and downward.
