Calgary Order Picker License

Calgary Order Picker License - Order picking is otherwise known as order preparation operation. This is amongst the chief processes in a warehouse and comprises people referred to as order pickers, collecting and taking articles in a specific quantity prior to shipment in order to complete customer orders. Order picking is a basic warehousing process. The effectiveness in which this particular task is accomplished could be directly connected to the productivity of a supply chain. Thus, order picking is one of the most controlled logistic processes. Order picking falls within the category of the warehouse management system.

There are several certain kinds of order picking. The main kinds include: pick to box method, wave picking method, picker to part method or piece picking, sorting systems method and zone picking method.

The pick to box method consists of the order picker just filling the boxes with things that are from their particular station. The box then moves on to other locations to until the order is done. In this particular technique, there is no movement of the order picker staff. In the wave picking method, the order pickers move round so as to collect the needed things for several orders. The piece picking or picker to part method is similar where the order pickers or picker move so as to collect the stuff required but for one order only.

In the sorting systems method, there is no movement of the order picking personnel. Instead, the things are brought to him or her through an automated system like for instance a conveyor system or an automatic storage. In the zone picking method, each order picker is assigned to one particular area. They are responsible for only realizing order picking in this specific area.
